PREFACE

The Project report is submitted as a part of courses leading to B.C.A. Conducted by (I.T. Sheliya Jafari B.C.A. college, sedrana),(Hemchandracharya North Gujarat University, Patan.)

Project work is a long establishment method of organizing, learning so as to encourage co-ordination of subject areas, It aims at close integration of theory and practical to give basic for student learning & produce more practical fundamental techniques. Project method is common with other student-centered technique help to develop market survey, planning decision making on for example identifying the critical integration process for producing equipment, component or model of process.

PROJECT PROFILE

1. **Project Title:** online Job Portal
2. **Front End:** HTML, CSS, JAVASCRIPT
3. **Back End:** .net Using c#
4. **Browser:** Chrome, Firefox

Project Introduction

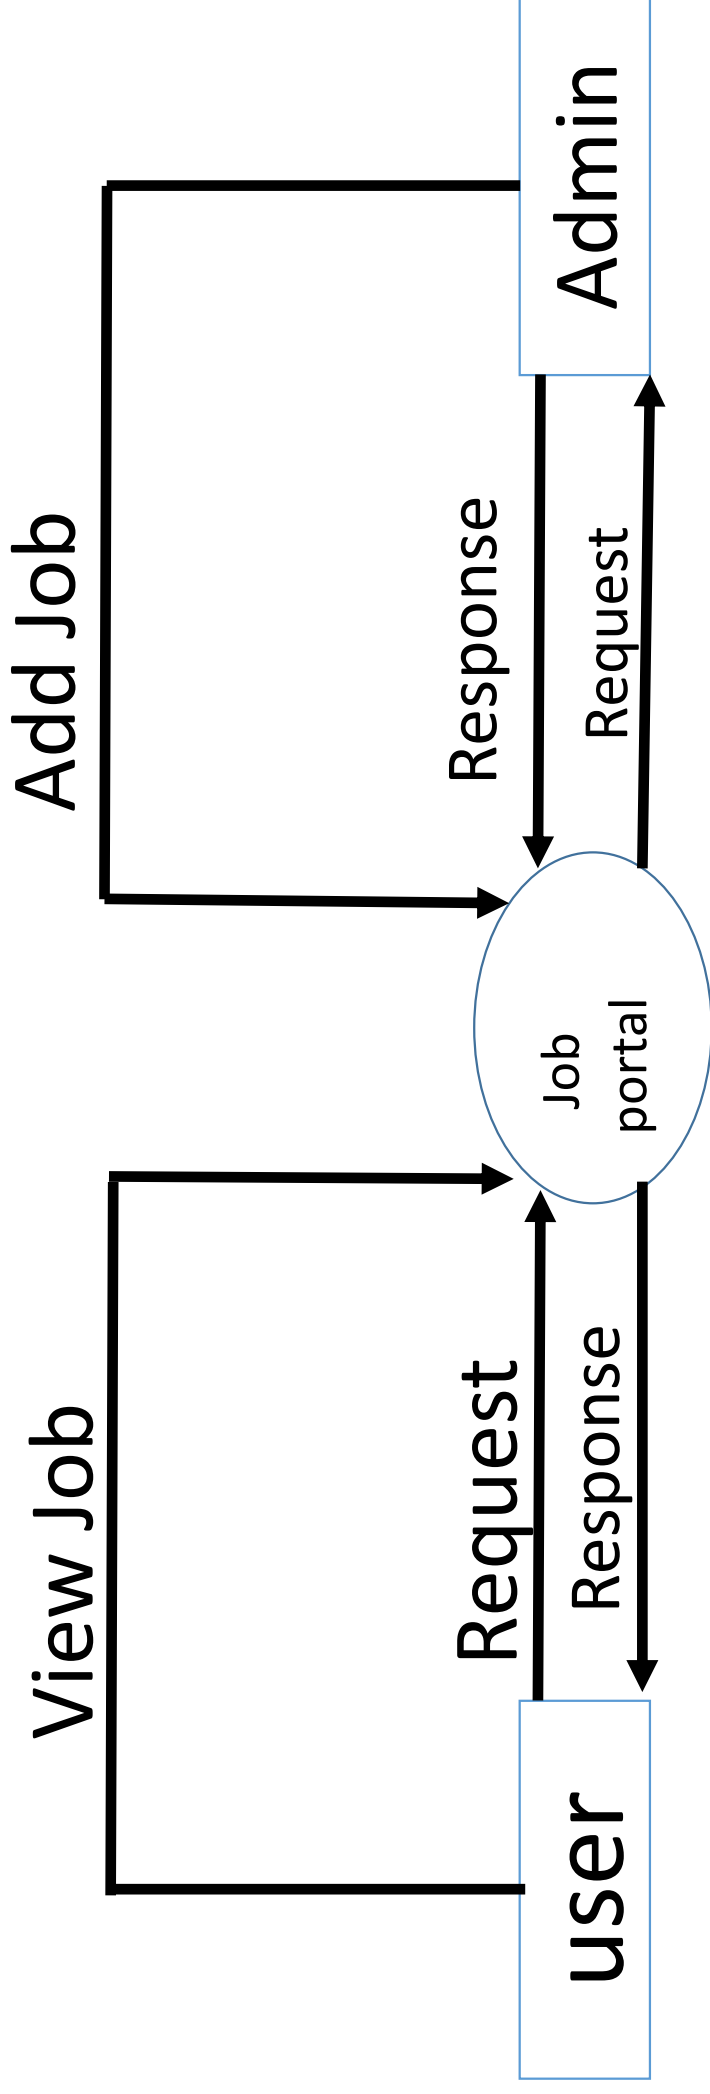

- This project is aimed at developing an Online Job Portal for the Placement Details for job seekers.
- The system is an online application that can be accessed throughout the particular organization.
- This system can be used as an Online Job Portal for job seekers.
- Job Seekers logging should be able to upload their information in the form of a CV.

Overview

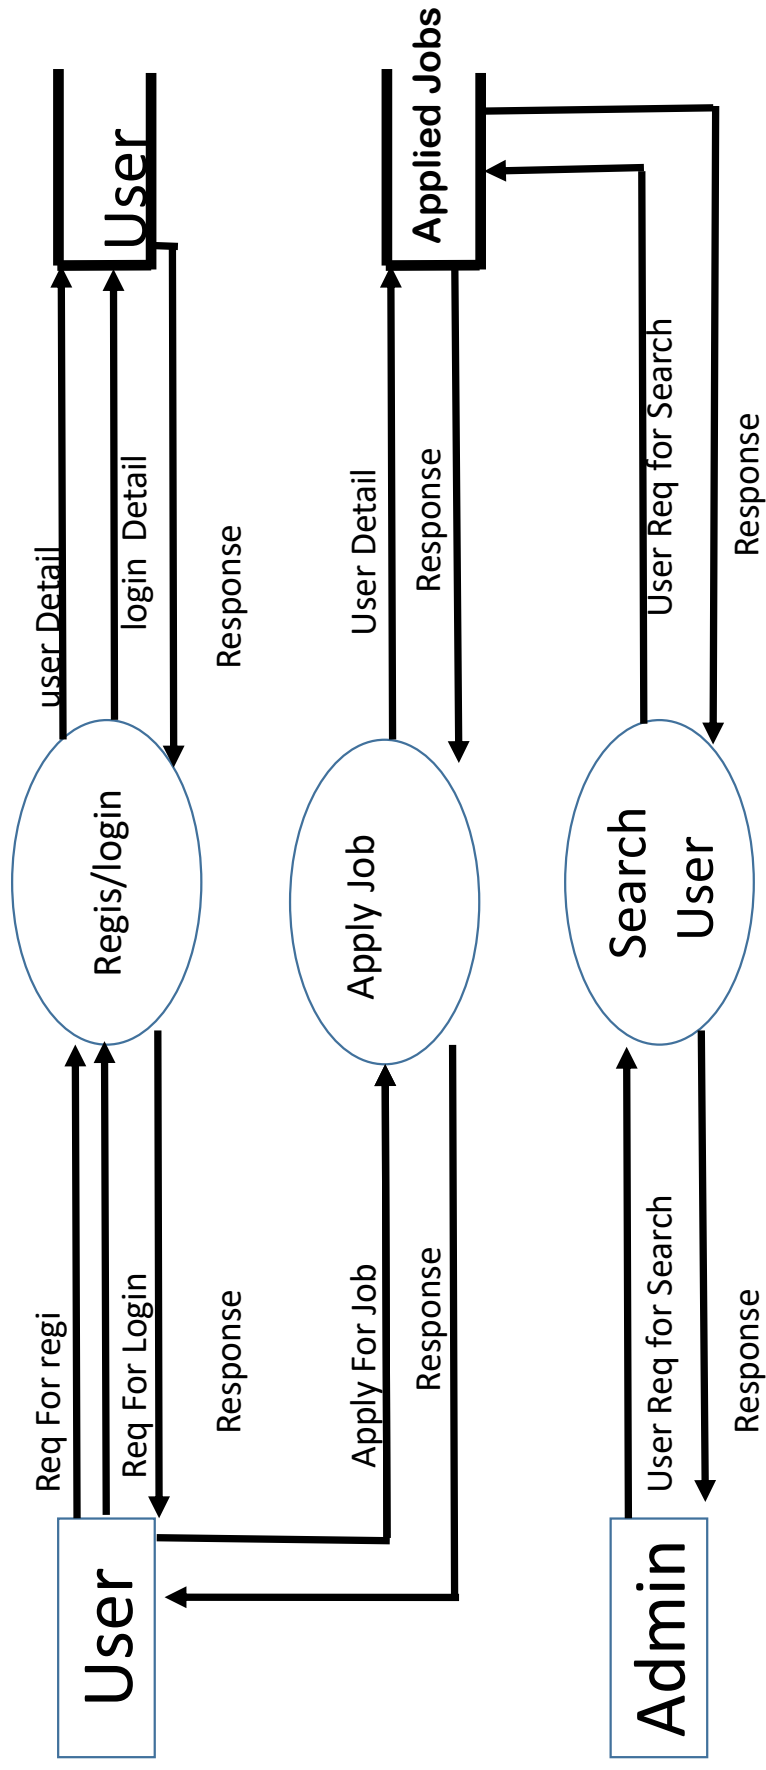

- An online job portal is a digital platform that connects job seekers with employers, facilitating the job search and recruitment process. It serves as a virtual marketplace where individuals and companies can interact to fulfill their employment needs. Here's a brief overview of an online job portal:
- **User Registration**
- **Profile Creation**
- **Job Search**
- **Resume Posting**
- And Many more....

Our recent news

Tech Industry Sees Surge in Remote Work Opportunities

As remote work becomes the new norm, the tech industry is witnessing a surge in job opportunities for remote positions. Companies are embracing remote work models to attract top talent and increase workforce diversity. According to recent data, remote job postings in tech have increased by 40% compared to pre-pandemic levels. This trend opens up new possibilities for job seekers looking for flexible work arrangements and employers seeking to tap into a global talent pool.

Job Market Sees Increase in Demand for Tech Skills

The job market is experiencing a surge in demand for tech skills, driven by rapid advancements in technology and digital transformation across industries. As companies strive to stay competitive in an increasingly digital world, there's a growing need for professionals with expertise in areas such as software development, data analysis, cybersecurity, and cloud computing. According to recent job market reports, technology-related roles are among the fastest-growing job categories, with employers actively seeking candidates who possess technical skills and proficiency in emerging technologies. From startups to multinational corporations, organizations are investing in talent acquisition and upskilling initiatives to meet the demand for skilled tech professionals.
